

Understanding Micro Plant Powder

A high percentage of Micro Plant Powder goes right through the body in a cleansing detoxification process.

These fresh water single cell microscopic plants are found in fresh water beds west of the Mississippi and found under the zeolite beds, these one celled plants form a hard casing around themselves and over many years drop to the bottom of the fresh water beds and accumulate into a compound solid form that consists of 89% or more of pure SILICA surrounded by oxygen molecules and including all basic minerals of potassium, Magnesium, Calcium, etc.....the effect they have on the body are incredible, remember if the body is given the proper nutrients it will heal itself, that is the way God made our bodies to heal and regenerate themselves for a healthier lifestyle. When we talk about silica we are talking about the basics of human life, 50 years ago silica was present in our food supply, today we only receive approximately 30% in our foods because it is not in our soil.

When Micro Plant Food is added to your regular diet it has been known to help cartilage to rebuild and in turn may bring synovial fluid back to the area relieving inflammation. Two cell types are present in the cartilage cell type A and cell type B are present and type B produces Synovial fluid. Another advantage of the Micro Plant Powder is affects the collagen in the skin for a glowing and healthy look. Since this microscopic plant food enters the blood stream and travels through the arteries, capillaries and veins it encompasses the complete circulatory system by absorbing heavy metals, parasites, fungus, bacteria, viruses, molds, mycotoxins and many other pathogens. This negatively charged plant food attracts these positive toxins and releases them from the body.

One gram of Micro Plant Powder has a surface area of over 8,600 Square feet of pure absorption surface with a strong negative charge. The greater the surface area the greater the absorption of toxins. It simply vacuums the body of garbage that is not needed or wanted. The Micro Plant Powder has a PH level of 8 making it an Alkaline food source which is great for the body by keeping all systems clear and balanced for health. Cancer cannot grow in an Alkaline body. Micro Plant Powder simply strengthens the body to a point of higher resistance by allowing for an improved immune system. **A high percentage of Micro Plant Powder goes right through the body in a cleansing detoxification process.**

Chemical Analysis

Moisture-3%
SiO₂-89%
Na₂O-1.2%
Fe₂O₃-1.7%
CaO-1.4%
MgO-.06%
K₂O-0.5%
PH – 8

Micro Plant Powder is 89% (Silica)

There is no life without Silica!!

Micro Plant Powder plays an important role in many body functions and has a direct relationship to mineral absorption. The average human body holds approximately seven grams of Silica, a quantity far exceeding the figures for other important minerals such as iron.

Let's look at some of the benefits of Micro Plant Powder:*

Lower High Blood Pressure!

Of the thousands of people that are using Micro Plant Powder, everyone that has high blood pressure has reported that it has gone down. It has been so thrilling to talk to people all over the United States and have them tell their stories. I am not just talking a few points---I am talking about LIFE-CHANGING numbers. Doctors are amazed--customers are amazed---You will be too.

Lower high Cholesterol!

Just as Micro Plant Powder has been lowering blood pressure--it has also been lowering cholesterol!! I have not talked with one person that has high cholesterol that has not had lower numbers after taking Micro Plant Powder. Most are reporting 40-60 points lower after only 2 weeks on Micro Plant Powder. I know it sounds too good to be true, but it works!

My joints feel so much better!!

Osteoporosis is a symptom of the aging process. As calcium in our body system depletes, our bones become brittle and weak. Taking only a calcium supplement can not correct or stop this threatening and crippling disease because the body cannot assimilate and make use of the calcium without the presence of silica. Evidence suggests that, instead of affecting healing, supplemental mineral calcium accelerates the leaching away of bone calcium and thus hastens the degenerative process of osteoporosis and similar diseases

that affect the supportive and connective tissues in the human body.

For osteoporosis, Micro Plant Powder may stop the pain and even restore the bodies self repair process. Osteoporosis symptoms attack women primarily after menopause but the degenerative process starts much earlier in their younger years. More women are dying of fractures caused by osteoporosis than of cancer of the breast, cervix, and uterus combined.

Silica is responsible for the depositing of minerals into the bones, especially calcium. It speeds up the healing of fractures and also reduces scarring at the site of a fracture. More and more research evidence shows that through a transmutation process, Micro Plant Powder is turned into calcium when it is needed. That is why some scientists refer to Silica as a precursor of calcium. Even when calcium is insufficient, the body can turn Micro Plant Powder into calcium that bones desperately need.

Nature's Internal Cosmetic!

In Europe and Asia Silica is used extensively as a health and beauty product for hair, skin, nails, bones, and joints. They have no FDA.

Tissue degeneration accelerates due to aging when connective tissue develops an increasing inability to retain moisture when left unassisted. Micro Plant Powder can help slow the degenerative process of connective tissue. With Micro Plant Powder the vitality and life which are often lost as the years accumulate can be naturally maintained or even restored to your skin. Collagen, largely made up of Silica, is the glue that holds us together. If our body has enough Silica, the collagen will make us look younger. Micro Plant Powder helps with skin problems and injuries including itching, rashes, abscesses, boils, acne, calluses, warts, eczemas, burns, frostbite, benign skin sores, insect bites and bed sores.

If you regularly follow a Micro Plant Powder regimen, your skin will keep its young look. A good Micro Plant Powder food program works far better than other products for maintaining healthier and longer lasting collagen.

Hair That Grows!

Hair is nature's greatest beauty enhancer. Hair deserves to be pampered. Hair at 90 micrograms per gram is almost as rich in Silica as are healthy bones, which contain 100 micrograms per gram. Silica is a major component of hair. Using Micro Plant Powder food should be part of your ongoing hair care program for revitalizing hair. Micro Plant Powder helps to prevent baldness, stimulates healthier hair growth and assures beautiful shine, luster and strength.

Teeth and Gums!

By hardening the enamel, Micro Plant Powder prevents cavities and preserves teeth. Micro Plant Powder also prevents bleeding gums, gum atrophy, and recession that cause the loosening of teeth, which could ultimately lead to tooth loss. Micro Plant Powder effectively fights ulceration and the decay of bones, teeth and also lessens inflammation.

Tough As Nails!

Your nail plates are complex protein structures that grow four to five millimeters per month on average. With Micro Plant Powder food, fragile nails become normal within a short period of time. Micro Plant Powder will beautify the appearance of your nails and improve their hardness, making them shinier and less prone to breaking.

The restorative effects of Micro Plant Powder will be most noticeable on your hair, skin, nails and teeth. Our skin and hair require Micro Plant Powder essentially for the same purpose as do other tissues. As we know, the supporting collagen underneath the skin enhances elasticity and beauty. Collagen owes that quality to Micro Plant Powder, which provides a beautiful complexion that is more than skin deep.

More Benefits!

- Micro Plant Powder lowers bad cholesterol and raises good
- Micro Plant Powder fades age spots
- Micro Plant Powder stimulates metabolism for higher energy levels
- Micro Plant Powder has a negative charge and bacteria have a positive charge. It is believed that Micro Plant Powder sweeps bacteria out of the body by trapping it in its honeycomb shaped skeletal form.
- Micro Plant Powder food helps repair and maintain vital lung tissues and protects them from pollution. By maintaining or restoring the elasticity of lung tissues, Micro Plant Powder reduces inflammation in bronchitis.
- It acts as a cough decreasing agent. Micro Plant Powder tones the upper respiratory tract (nose, pharynx, larynx) and reduces swelling because of its positive action on the lymphatic system.
- Micro Plant Powder food keeps menopause free of stress and helps to prevent many unwanted side-effects of menopause
- Cancer can not survive in cells that have the correct levels of Micro Plant Powder.
- Micro Plant Powder works with other antioxidants to prevent premature aging and to preserve youthfulness.
- Micro Plant Powder can help prevent kidney stones and heal infections of the urinary tract. It is a natural diuretic which can increase excretion of urine by 30 percent, thus flushing the water-excreting system and restoring normal function to these vital organs.
- The presence of sufficient Micro Plant Powder in the intestines will reduce inflammation of the intestinal tract. It can cause disinfection in the case of stomach and intestinal mucus and ulcers. Micro Plant Powder can prevent or clear up diarrhea and its opposite, constipation.
- Micro Plant Powder will help normalize hemorrhoidal tissues.
- In regulating and normalizing the bowels, Micro Plant Powder has a pleasant side effect; it can alleviate lower back pain, which often troubles the elderly.
- Micro Plant Powder proves effective with female discharge, abscesses and ulcers in the genital area and cervix, as well as mastitis (especially for breast feeding mothers).
- The intake of Micro Plant Powder acts as a supportive treatment for inflammation of the middle ear. Because of the beneficial effectiveness on the lymphatic system, Micro Plant Powder can be used for swelling of the lymph nodes in the throat.

- Has anti-inflammatory disinfecting, absorbing and odor binding effects.
- Micro Plant Powder can normalize circulation and regulate high blood pressure (hypertension).
- Micro Plant Powder can decrease vertigo, headache, tinnitus (buzzing of the ears) and insomnia.
- Micro Plant Powder can help diabetes by promoting synthesis of elastase inhibitor by the pancreas.
- Micro Plant Powder can help arterial disease by strengthening the blood vessels. Studies confirm that with age, Silica disappears from the aorta, the heart's key blood vessel thus weakening its critical connective tissue and resulting in a greater cardiac risk.
- Micro Plant Powder can help prevent Tuberculosis.
- By improving the elasticity of the joints, Micro Plant Powder helps rheumatism.
- Micro Plant Powder has inhibitory effects on coronary diseases.
- Micro Plant Powder can help avoid or alleviate Alzheimers disease by preventing the body from absorbing aluminum and may flush out aluminum from the tissues. Micro Plant Powder can stimulate the immune system.

How to Use Micro Plant Powder:

Daily Micro Plant Powder needs of humans are 20-30 mg. In Years past, our bodies would get enough silica from our diet. Unfortunately, many of the foods we now eat have lost their nutritional value due to soil nutrient depletion, food processing, and chemicals. Use of Micro Plant Powder is essential to total body health.

The recommended amount is 1 heaping tablespoon of Micro Plant Powder 3 times a day. You may use more or less if desired. You can mix it with in water or any other liquid you may prefer. Many are even putting Micro Plant Powder in protein shakes, applesauce and yogurt. Micro Plant Powder is Food Grade and very pure. It blends well and is odorless and tasteless. Some have experienced higher energy levels but do not worry about getting too much Micro Plant Powder the body will automatically eliminate the excess through the blood stream, kidneys, liver and intestines.
